Professional Experience

Brick Bridge Consulting, LLC

November 2017-Present

Junior Software Developer/Junior Project Manager

- Experience in managing multiple projects/clients of varying sizes simultaneously
- Developed project management and analytical skills by interfacing directly with clients to develop solutions specifically for their business needs in projects ranging from \$1000 - \$100,000+
- Use GoToMeeting to engage with clients for live demos/training/feedback sessions for projects
- Engage with clients on-site as necessary
- Frequently utilized Amazon Web Services to host and deploy cloud-based functionality (Familiarity with Lambda, S3, CloudWatch, and DynamoDB)
- Manipulate third-party software (GlobiFlow, Zapier) to deliver simple automations and functionality to Podio installations.
- Utilized in-house RESTful API and C# Lambda functions to interact with Podio installations and deliver complex automations and other functionality asynchronously
- Use CloudWatch to identify and resolve issues with code in development and production environments
- Assist in management of MySQL databases used for large projects
- Conducted simple unit testing for in-house API
- Utilized Swagger to create API documentation
